

Thank you for supporting the Armor Down Girls with your generous donation. I really like our book club and you helped make it possible. --I Brown

*Dr. Felisha Parsons (Eta)
Armor Down Girls*

This stipend allows our future doctors and scientists to experience dissection at an early age. It allows us to spark their interest and give them a memorable experience.

Arleta Bazile (Beta Beta)

Applications for stipends are available from the Foundation secretary or on the state website. Deadlines are May 1 and November 1.

Who We Are

The Foundation income supports research and projects proposed by members, chapters and coordinating councils of DKG/ Illinois State Organization.

I am so grateful to the Foundation Board for their generous stipend. Thanks to the Foundation, my class went from students to scientists! Last spring my class got to use tools real scientists use. They explored rocks and minerals, and got to use a special microscope. Even when the students had to go remote, they benefited by watching online how circuits and coding work. The Foundation allowed our class to go from reading Science to doing Science!

Julie Bauer (Beta Pi)

The Foundation awarded its first stipend in 1987. Since then, more than 300 stipends have been allocated, totaling more than \$250,000.
